As you use your drive, changing and deleting information, the SSD needs to make sure that invalid information is deleted from the drive and that there is.. After the clone I ran Repair Disk and noticed at the end of the repair it 'trimmed' my SSD.. It looks like a simple Disk Repair will trim an SSD I got a new SSD and so I booted from a tertiary drive to clone my old SSD onto my new SSD.. Maybe I just missed this before, but I don't recall seeing this trim If you bought a Mac with an SSD installed from the factory, then TRIM is enabled by default and you're all set—nothing to worry about.. Use the Windows key + X keyboard shortcut to open the Power User menu and select Command Prompt (Admin).. If, on the other hand, you later added a third-party SSD to your system, then TRIM will be disabled by default. b0d43de27c [Download free review youtube mp3 converter for windows 7 home edition 64](#)
